

Ifö Electric in Bromölla, on the border between Skåne and Blekinge, by the beautiful Ivö lake, has concentrated on ceramics – Nature's own material – for more than 100 years. After decades in the grip of plastic and metal, both electricians and end-users have discovered the superior properties of ceramics. Easier to keep clean, longer lifespan, enhanced resistance to heat, not prone to discolouring and also withstand damp, cold and aggressive environments.

The fittings in the Classic series are the faithful servants among Ifö Electric's wide range. They are ideal in the majority of areas where function and timeless design are the keywords. Added to this is an extremely competitive pricing. Go for Classic and you are assured a fitting that will last – both functionally and in terms of design.
