

Ifö Electric in Bromölla, on the border between Skåne and Blekinge, by the beautiful Ivö lake, has concentrated on ceramics – Nature's own material – for more than 100 years. After decades in the grip of plastic and metal, both electricians and end-users have discovered the superior properties of ceramics. Easier to keep clean, longer lifespan, enhanced resistance to heat, not prone to discolouring and also withstand damp, cold and aggressive environments.

IFÖ BASIC PENDANT • WALNUT

Ifö Electric has developed still further the Basic series with a pendant. The Swedish manufactured stylish light fitting consists of a solid woodblock (100 cm x 3.7 cm x 9 cm) suspended from a wire and equipped with four white ceramic lamp-holders (NCS S 1502-G50Y).

Using light sources such as Halospar/Hispot or Halogen Reflektor you obtain well-dimmed lighting and even some peripheral lighting. By using a dimmer instead of a normal switch, the amount of light can be adapted to your needs and you can also save energy.

The light fitting is manufactured in walnut, birch, oiled oak, black-stained oak as well as in a grey-varnished version (NCS S 2500-N). Supplied with 2 (x) s-metre wires, a 3-metre transparent cable, a 2-polar plug, 3 (x) cable clips, variable adjustable wire locks in the ceiling mounted on round chromites ceiling liners. The suspension of the light fitting has a c/c measurement of 75 cm. The total height of the light fitting without light source is 10.5 cm. The packing consists of a matt black shock-proof cardboard tube highly suitable for shop exposure.

Ifö Basic Pendant is sold by leading electrical wholesalers and well-stocked electrical hardware retailers.
