

Ifö Electric in Bromölla, on the border between Skåne and Blekinge, by the beautiful Ivö lake, has concentrated on ceramics – Nature's own material – for more than 100 years. After decades in the grip of plastic and metal, both electricians and end-users have discovered the superior properties of ceramics. Easier to keep clean, longer lifespan, enhanced resistance to heat, not prone to discolouring and also withstand damp, cold and aggressive environments.

## MODUL 20 • 75 117 54 • 6017-400-10

Modul 20 are modularised ceramic bases for installations with IP20 specification. The focus is placed on user-friendliness and flexibility. First and foremost – the base is divided into two, facilitating installation appreciably. Fit the base to the wall and then connect the wiring in the holder. Significantly easier than before when the base had to be balanced in the hand while the wiring was being connected up. The Modul-20 base is, in addition, capable of transition and has considerable space for wiring.

Flexible – When you install Modul 20 in the incandescent light version you may, if required, replace the incandescent lamp holder with one for a compact fluorescent light in just a few minutes. And vice versa, of course. The same base thus enjoys a doubled up area of application. Choose a straight or slanting base. Globes are available in different designs.

<i>Item no</i>	6017-400-10
<i>E no</i>	75 117 54
<i>EAN no</i>	7312900060170
<i>El no</i>	30 319 24
<i>S no</i>	4211915
<i>Base colour</i>	White
<i>Glass</i>	White acrylic
<i>Lamp holder</i>	G24 q-1
<i>Wattage</i>	10W / 13W
<i>Base</i>	Slanting
<i>Class</i>	IP20
<i>Globe Ø</i>	200 mm
<i>Height</i>	220 mm
<i>C-C meas</i>	60-66 mm
