

Ifö Electric in Bromölla, on the border between Skåne and Blekinge, by the beautiful Ivö lake, has concentrated on ceramics – Nature's own material – for more than 100 years. After decades in the grip of plastic and metal, both electricians and end-users have discovered the superior properties of ceramics. Easier to keep clean, longer lifespan, enhanced resistance to heat, not prone to discolouring and also withstand damp, cold and aggressive environments.

GLOBE • WHITE OPAL • 1-6110

The majority of the globes are spares for our light fittings. There are globes as spares for the majority of the fittings we have produced since the 1960s.

The globes are, for the most part, made of white polished opal glass. We also have globes made of polycarbonate (PC), acrylic (PMMA), polyethylene high density (PEHD) and polyethylene low density (PELD).

<i>Item no</i>	1-6110
<i>E no</i>	79 064 93
