

Ifö Electric in Bromölla, on the border between Skåne and Blekinge, by the beautiful Ivö lake, has concentrated on ceramics – Nature's own material – for more than 100 years. After decades in the grip of plastic and metal, both electricians and end-users have discovered the superior properties of ceramics. Easier to keep clean, longer lifespan, enhanced resistance to heat, not prone to discolouring and also withstand damp, cold and aggressive environments.

Globe Opus 200

<i>Product No.</i>	6183-30
<i>E No.</i>	79 061 34

<i>EAN No. glass packing</i>	7312900034324

The glass is seamless, with a matt opal design and of the highest quality.

In addition to being used in reserve globes, they can be used where there are light fittings with glass threads 84.5, 99 and 185.5 mm installed. With such a simple measure as changing a globe, you can provide an older installation with a modern appearance.
