

Ifö Electric in Bromölla, on the border between Skåne and Blekinge, by the beautiful Ivö lake, has concentrated on ceramics – Nature's own material – for more than 100 years. After decades in the grip of plastic and metal, both electricians and end-users have discovered the superior properties of ceramics. Easier to keep clean, longer lifespan, enhanced resistance to heat, not prone to discolouring and also withstand damp, cold and aggressive environments.

IP 57 CEILING FITTING • 52721-100-10

Casing class, IP 57, also makes the bases ideal for installation outdoors and in aggressive environments. The bases do not need protective earthing. They are environmentally-friendly, do not discolour, withstand heat and harsh environments and are very easy to keep clean.

The bases are made of high quality porcelain in white (NCS: S 1502-G50Y) or grey (NCS: S 6005-G80Y) glaze. The bases are supplied with base lead-in and with two switch openings in the sides.

All bases have a sealed connection space with four mantle clamps for maximum 3 x 2.5 mm². Extra seal sets for wire lead-in are ordered separately.

The bases are supplied with glass gasket.
