

Ifö Electric in Bromölla, on the border between Skåne and Blekinge, by the beautiful Ivö lake, has concentrated on ceramics – Nature's own material – for more than 100 years. After decades in the grip of plastic and metal, both electricians and end-users have discovered the superior properties of ceramics. Easier to keep clean, longer lifespan, enhanced resistance to heat, not prone to discolouring and also withstand damp, cold and aggressive environments.

IP 57 CEILING FITTING • 52752-000-10

The IP 57 encapsulation classification also makes these sockets ideal for installation outdoors and in severe conditions. The sockets do not need protective earthing. They are suitable for recycling, do not become discoloured, tolerate heat and difficult conditions, and are easy to keep clean.

The sockets are made of high quality porcelain with white (NCS: S 1502-G50Y) glaze. The sockets are supplied with bottom outlets and with three break-out openings at the side.

Connection to lamp holder max. 2x1.5 mm².

The sockets are supplied with glass seals.
