Ohm

Ohm is a lighting collection inspired by old porcelain insulators, one of the first electro technical products manufactured by Ifö in the early 1900s. A family of porcelain luminaires for indoors and outdoors - walls, ceilings and tables. Designed by Kauppi & Kauppi.
Our foot lamp holder has been around since the 60s and a new bigger version was released in 2018. That's what we call timeless design.
Ifö Opus is a series of light fittings in matt opal or clear glass in an elegant cylindrical shape. They can be installed on walls or in ceilings, both indoors and outdoors. Opus are available in black, white or grey glaze.
An excellent alternative to recessed downlights! Ifö Cool is designed in timeless, elegant, glazed porcelain that does not age. Easy to install directly in ceilings or on walls. Cool is available in two heights depending on the IP rating, Low IP23 and High IP44. Cool is available in white, grey or black glaze.

Simple design can be hard to achieve. This insight was used to create the most simple lamp holder imaginable. The lamp holder was named Basic and is merely a link between the power and the light source. Basic is available straight or slanted.
A sun god in Egyptian mythology has given name to this series of light fittings. The series is suitable for ceilings and walls both indoors and outdoors.

Classical light fittings in a timeless design. Just as current today as they were in the mid-60s when they were designed by Sigvard Bernadotte.

In connection with the 100 year anniversary of Ifö in 1987, Knud Holscher designed the series Light On in clean, simple lines – it is still just as beautiful.

**single**
- Shiny | E14 | Height 180 mm | Depth 100 mm | IP44 | Wall

**double**
- Shiny | 2xE14 | Height 297 mm | Depth 100 mm | IP20 • IP44 | Wall

**light on**

- GU10 | Height 107 mm | Ø100 mm | IP23 | Ceiling
- GU10 | Height 114 mm | Ø100 mm | IP44 | Ceiling
The Classic series is a faithful servant in the range. Ideal in all spaces where function and timeless shapes are keywords, both indoors and outdoors. Several models are available with a LED module.
Classic Globe, an elegant classic. A range of white and black bases together with globes in different sizes in matt opal glass, shiny opal glass or clear glass. Available with LED modules in versions with opal shades. Suitable both indoors and outdoors.
Each shade in the Contrast series has been given a name of a local area to pay tribute to the countryside around Bromölla.

Ifö Contrast is suitable both in private and public environments – bathrooms, entrances, hallways, kitchens, offices, outdoors...

Several models are available with a LED module. White or black glazed bases are available as an option.
Ifö Open is a stylish light fitting in a timeless design which makes it attractive in any environment.

Ifö Open is based on a series of open glass shades combined with grey, white or black glazed bases. The shades are available in matt opal, frosted or clear glass. LED versions are available combined with matt opal shades.
Klack has got its name from Ivö Klack, the kaolin quarry on the island Ivö. The quarry supplied Iföverken with kaolin until the 1950s. A fixture in its simplest form with clean straight lines and a beautiful glazed surface. Replace the light source - and you have changed the nature of the entire luminaire.
An elegant pendant series that fits well in both home and public environments. Four different shades in two versions, shiny opal or clear glass. Ceiling rose in porcelain. Smycka combines nicely with our Open Series.
Porcelain bases are ideal for use in saunas, as they can withstand tough environments and have long durability. Our sauna light fittings are rated from IP44 to IP55. Select according to taste and style; light fittings in beautiful classical brown glaze, a little stricter in grey or more modern in white. Why not a crystal chandelier?

*Crystal chandelier Koppen and Koppen+Pigg must be ordered separately (Opus 120)
